

Saved Filter Portlet

1. Overview

The **Saved Filter** portlet displays the results of a specified [issue filter](#) on the dashboard. It can be configured to display a maximum number of issues from the collection returned from the specified filter.

2. Adding Portlet to Dashboard

1. Navigate to the [dashboard configuration](#) page.
2. Select the 'Saved Filter' portlet.
3. Click Add.
4. Select the filter on which the portlet will focus.
5. Select the maximum number of issues that the portlet will display.
6. Select if the filter description (if any) should be displayed within the portlet.

Save Default Portlet: Show Saved Filter

Shows the issues/results for a saved filter.

Filter: Filter to be shown

Number of issues: Number of issues to be displayed

Show Description: Should the description be shown under the name in the portlet

Saved Filter Portlet Form

7. Click Save.
8. The portlet can be positioned on the dashboard through the [dashboard configuration](#) page.

3. Dashboard Display

The **Saved Filter** portlet should appear as follows on the dashboard:

Issues: My Filter (Displaying 5 of 8)			
	TST-6	Improve Feature	
	TST-5	New Feature	
	TST-4	More Testing	
	TST-3	Test 2	
	TST-2	Test 1
