To Whom It May Concern,

Letter of Assessment

From 13th July to 31st July 2020, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted a security review of Edge Authenticator.

The engagement commenced with a kick-off meeting to confirm access, project scope and a walk through of the product. The assessment was performed by one consultant over the assessment period. The Edge Authenticator is designed to provide an authentication service via a dedicated API end-point which allows services and proxies to leverage different types of authentication methods. The assessment focused on gaining an understanding of the threats presented by the Edge Authenticator and investigated potential design and implementation weaknesses along with technical caveats and edge-cases that may have an adverse security impact. The engagement was wrapped up with a close-down meeting and a report was issued to Atlassian via Confluence.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Nina Rodgers
Operations Manager
