

08 January 2024

Atlassian Corporation Plc. Customers:

Coalfire Controls, LLC prepared the latest SOC 2 Type II report relevant to the following Atlassian Cloud products, pursuant to Statement on Standards for Attestation Engagements #18 (SSAE #18), and the report dated December 16, 2023. This report includes tests of operating effectiveness for the period ending September 30, 2023.

- Atlas
- Atlassian Analytics
- Bitbucket Cloud (including Bitbucket Pipelines)
- Compass
- Confluence
- Data Lake
- Forge
- Halp
- Jira Align
- Jira Software (including A4J)
- Jira Product Discovery
- Jira Service Management (including Assets, JSM Chat)
- Jira Work Management
- Opsgenie
- Statuspage
- Trello

Atlassian recognizes the need to maintain an appropriate internal control environment and report upon the effectiveness, as well as material changes to its internal controls. As of January 8, 2024, I am not aware of any material changes in our control environment that would adversely affect the Auditor's Opinion reached in the September 30, 2023, report for the above products.

You should also be aware that Atlassian, as a normal part of its operations, continually updates its services and technology as appropriate. In addition, the controls for Atlassian were designed with certain responsibilities required of the system users (See User Control Considerations in the SOC 2 report). Atlassian controls must always be evaluated in conjunction with an assessment of the strength of these user controls.

Finally, to conclude upon the design and effectiveness of internal controls for Atlassian, you must read the reports relevant to the above Atlassian Cloud products and the corresponding reports available for download at <https://www.atlassian.com/trust/compliance/resources/soc2>. This letter is not intended to be a substitute for the SOC 2 report.

Sincerely,

DocuSigned by:
