Exam topics are subject to change. Visit [atlassian.com/certification](atlassian.com/certification) to ensure you have the most up-to-date topics.

Exam Topics

**Configuring and managing a Software project**

- Explain the differences between a Software type project and a Business type project
- Given business requirements recommend the appropriate configuration of one or multiple Jira Software projects
- Given business requirements recommend the appropriate configuration of project workflows
- Edit project screens and project workflows to meet business requirements
- Given requirements, determine how and configure project components and auto assignment
- Given a scenario identify appropriate use of versions
- Apply knowledge required to manage project role membership
- Troubleshoot issues with roles, permissions, screens and workflows and escalate if required

**Configuring and managing boards (Scrum, Kanban)**

- Given requirements determine when and how to set up boards
Translate requirements from one or multiple teams into appropriate board configurations
- Determine the effects of configuring estimation and time tracking on Scrum boards
- Troubleshoot board configurations

**Planning and working in a Software project (estimation, backlog grooming, sprint planning and sprint management)**

- Explain the concepts of using epics and versions in a Software project
- Describe unique characteristics of different issue types when used in a Jira Software context (epics, standard issue types, sub-task issue types)
- Explain and predict the impacts of modifications to an active sprint (scope changes)
- Explain the concept and impact of ranking issues
- Given a scenario determine the most appropriate sprint setup (across teams / boards / projects)
- Manage releases (versions/sprints) in Software projects using boards or the Release Hub
- Troubleshoot issues with versions / estimation / sprints / epics / ranking

**Reporting in Jira Software**

- Based on requirements, recommend appropriate reports, filters and dashboard gadgets
- Given requirements, explain how to create and configure appropriate JQL filters for use in built-in reports
- Troubleshoot the output of agile reports

**Integrating Jira Software with other Atlassian tools**

- Given business requirements recommend appropriate integration with other Atlassian tools (Bitbucket, Bamboo, Fisheye / Crucible (FeCru), Confluence)
- Interpret development-related information provided by other Atlassian applications
