

## Find the Perfect Test Management Solution for Your Unique Business Needs

Whether you're upgrading from Excel or replacing an open source tool to an underperforming legacy suite, Zephyr offers three comprehensive solutions that adapt to fit your unique testing needs.

The right edition for your business depends on the size of your team, which test management capabilities you need, and the level of customization and integration you require. Best of all, you can choose the edition that best fits your business needs today, with the confidence that comes from a seamless upgrade path, allowing your Zephyr solution to easily grow with your business.

### Zephyr Enterprise Edition v4.7

Zephyr Enterprise Edition is a real-time test management platform that manages all aspects associated with software quality; integrates various test tools and systems, offers global access, fosters collaboration and provides management visibility. Zephyr Enterprise Edition is best suited for departments and enterprises that have mature processes, run multiple projects in parallel with very structured testing cycles, and a lot of automated and/or manual testing.

Zephyr Enterprise Edition has best-of-class integration with JIRA 5 and 6 either Server, Data Center or JIRA Cloud. Now comes with new mobile test execution client.

### Zephyr for JIRA Server

Zephyr for JIRA Server is an add-on application that augments JIRA, providing cost-effective, highly sophisticated test management capabilities right inside your JIRA Server instance. As the only vertical test management application built exclusively for the JIRA platform, Zephyr for JIRA Server completes end-to-end issue tracking and test management inside JIRA by adding testing to the overall planning, development, bug tracking and reporting process.

Together, Zephyr for JIRA Server and JIRA enable developers, testers and the entire project team to be better prepared at every stage of the software development lifecycle to design, plan, build and launch great software.

### Zephyr for JIRA Cloud

Zephyr for JIRA Cloud delivers your favorite test management add-on for JIRA in the cloud. Teams that have standardized on the Atlassian Cloud solution can now create, plan, and execute tests right inside of their JIRA instance. Together, Zephyr for JIRA Cloud and JIRA Cloud enable developers, testers and the entire project team to be better prepared at every stage of the software lifecycle to plan, build, test and launch great software.

"Zephyr was straightforward and while evaluating the product, our users picked it up quickly. As an IT services company that has to deal with major deployments for our clients, it was refreshing to use something that was so quick and easy to install. The metrics and reporting saved us quite a bit of admin work in compiling reports and we experienced productivity gains from our day-to-day operations."

— *Jitendra Degapudi,*  
*Senior QA Lead,*  
*Fujitsu Consulting*

"We have 15,000+ test cases that are run fairly often. Zephyr (Enterprise Edition) makes it easy to separate, prioritize and assign them. We are able to create and execute test cases 4x faster than using Testlink."

— *John Basanese,*  
*Director of QA*  
*Engineering,*  
*Barnes & Noble*

# Selecting the Right Zephyr Edition

	Zephyr Enterprise Edition v4.7	Zephyr for JIRA Server	Zephyr for JIRA Cloud
<b>Summary</b>
