To Whom It May Concern,

Letter of Assessment

From 23rd September 2019 to 30th September 2019, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted a review of the “Automation for Jira” marketplace application.

The engagement commenced with a detailed briefing and walk-through by Atlassian of the solution to obtain an understanding of the project and its threat model. The assessor focused on white-box penetration testing of the Jira Plugin and the support application. The testing prioritised the authentication and authorisation security controls of the plugin to identify weaknesses that could allow cross-tenant data leakage and unauthorised access. In addition to the application testing, a review of the AWS configuration was performed to identify potential weaknesses and defence in depth improvements.

elttam is a boutique IT security consulting firm providing services to the Fortune 500, global financial institutions, leading technology companies, Australian federal government, and up and coming technology start-ups. We pride ourselves on providing high-quality technical expertise in the areas of security assessments and training services.

Sincerely,

Matt Jones
