To Whom It May Concern,

### **Letter of Assessment**

From 28th to 30th September 2020, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted a review of Personal Access Tokens (PATs).

The engagement commenced with a kick-off meeting to confirm access and project scope and a walk through of the product. The assessment was performed by one consultant over the assessment period following a white-box testing methodology and a combination of source code review and dynamic testing. The objective of the assessment was to peer review the design and implementation on the PAT feature for Jira, which allows users to create tokens to use to authenticate with instead of having to use basic authentication. The engagement was wrapped up with a close-down meeting and a report was issued to Atlassian.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Nina Rodgers  
Operations Manager
