Exam Topics: ACP-300 Agile Development with Jira Software Server

Issue Date	Exam Validated for Product(s)
06 Apr 2020	Jira Software Server Enterprise Releases

Exam topics are subject to change. Visit atlassian.com/certification to ensure you have the most up-to-date topics.

Configuring and managing a Software project (20-30%)

Explain the differences between a Software type project and a Business type project.

Given business requirements recommend the appropriate configuration of one or multiple Jira Software projects.

Given business requirements recommend the appropriate configuration of project workflows.

Edit project screens and project workflows to meet business requirements.

Given requirements, determine how and configure project components and auto assignment.

Given a scenario identify appropriate use of versions.

Apply knowledge required to manage project role membership.

Troubleshoot issues with roles, permissions, screens and workflows and escalate if required.

Configuring and managing boards (Scrum, Kanban) (10-20%)

Given requirements determine when and how to set up boards.

Translate requirements from one or multiple teams into appropriate board configurations.

Determine the effects of configuring estimation and time tracking on Scrum boards.

Troubleshoot board configurations.

Planning and working in a Software project (estimation, backlog grooming, sprint planning and sprint management) (25-35%)

Explain the concepts of using epics and versions in a Software project.
Describe unique characteristics of different issue types when used in a Jira Software context (epics, standard issue types, sub-task issue types).
Explain and predict the impacts of modifications to an active sprint (scope changes).
Explain the concept and impact of ranking issues.
Given a scenario determine the most appropriate sprint setup (across teams / boards / projects).
Manage releases (versions/sprints) in Software projects using boards or the Release Hub.
Troubleshoot issues with versions / estimation / sprints / epics / ranking.

Reporting in Jira Software (20-30%)

Based on requirements, recommend appropriate reports, filters and dashboard gadgets.
Analyze data from Agile reports: Burndown Chart, Control Chart, Cumulative Flow Diagram, Epic Burndown, Epic Report, Sprint Report, Release Burndown, Velocity Chart, Version Report.
Given requirements, explain how to create and configure appropriate JQL filters for use in built-in reports.
Troubleshoot the output of agile reports.

Integrating Jira Software with other Atlassian tools (5-10%)

Given business requirements recommend appropriate integration with other Atlassian tools (Bitbucket, Bamboo, Fisheye / Crucible (FeCru), Confluence).
Interpret development-related information provided by other Atlassian applications.
