To Whom It May Concern,

Letter of Assessment

From 27th April 2020 to 1st May 2020, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted a review of an Atlassian OAuth2 implementation.

The engagement commenced with a detailed briefing and walk-through by Atlassian of the solution to obtain an understanding of the project and its threat model. The assessor focused on white-box penetration testing that included manual code review of the OAuth2 framework and its new authorisation mechanisms. The five-day engagement was wrapped up with a close down meeting with key observations and takeaways documented in Confluence and all findings inputted into Jira.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government, and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Nina Rodgers
Operations Manager
